## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of claims 21-34, 46, 47 in the reply filed on 07-19-04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Claim Objections***

Claim 23 is objected to because of the following informalities: the metallized thermoform lacks antecedent basis. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 47 is rejected under 35 U.S.C. 102(e) as being anticipated by Courtney et al.

Courtney et al disclose a conductive polymer enclosure (10) made of a metallized polymer material (14)(col. 5, lines 3-5)

***Allowable Subject Matter***

Claims 21-34, 46 are allowed

The following is an examiner's statement of reasons for allowance:

The limitation "a conductive material on at least one surface of the shaped polymer substrate" in combination with other limitations present is neither taught nor disclosed in the prior art of record.
